

FMBXXX FIRMWARE ERRATA

V0.6

1) INTRODUCTION

We are always improving our devices performance, stability and reliability. That's why Teltonika is one of the leading GNSS trackers manufacturers in the world.

This document describes FMBXXX¹ devices firmware improvements, changes, new features implementations as well as current firmware release version.

2) FIRMWARE VERSIONING

A) STRUCTURE

FMB.VER. [XX]. [YY]. [ZZ].Rev. [##]

B) SYNTAX DESCRIPTION

XX - client number. Value range: 00 - Alpha development, 01 - Teltonika, 02..99 - Specific clients

YY – branch number, shows major changes in firmware, i.e. new module support added or new major feature added.

ZZ – major changes like bigger fixes, improvements and new features addition.

- minor changes like small fixes and improvements.

¹ FMBXXX – FMB9, FMB0. Except FMB630.

Ol.00.32.Rev00 Ol.00.32.Rev00 Ol.00.30.Rev05 Ol.00.30.Rev05 Ol.00.30.Rev05 Ol.00.30.Rev05 Ol.00.30.Rev05 Ol.00.30.Rev06 Ol.00.30.Rev0	Firmware Version	Release date	Changes
GNSSS IO Text "GNSSpower" changed to "GNSSStatus" Added zero filling the ibutton values Enabled IOS GNSS, Total Odometer in deleep mode Added ccid validity check before PIN registration Minimized power consumptions in sleep modes SD runtime improvement Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excessive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality I Delements ICCID and 5D Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement Unplug detection improvement GPBS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Added FOTA WEB functionality
Added zero filling the ibutton values Enabled IOs GNSS, Total Odometer in dsleep mode Added ccid validity check before PIN registration Minimized power consumptions in sleep modes SD runtime improvement Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'sdformat' – deletes all internal memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Added 5 geozones functionality Io elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			PIN Entering to second SIM improvement
01.03.03.Rev00 2017.07.24 Enabled IOs GNSS, Total Odometer in dsleep mode Added ccid validity check before PIN registration Minimized power consumptions in sleep modes SD runtime improvement Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgsp command improvement Now there are 200 authorised sms numbers Operator Black list implementation 4 Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deletrecords' – deletes Avi records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			GNSSS IO Text "GNSSpower" changed to "GNSSStatus"
a Added ccid validity check before PIN registration beinimized power consumptions in sleep modes 5 Druntime improvement Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation 4 Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory Faster GPS Fix after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Added zero filling the ibutton values
Minimized power consumptions in sleep modes SD runtime improvement Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'defletes all internal memory SMS command 'deleterecords' – deletes Avi records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Enabled IOs GNSS, Total Odometer in dsleep mode
01.03.03.Rev00 2017.07.24 SD runtime improvement Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation 4. Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes Avl records from memory Faster GPS FIX after leaving sleep mode 'dodoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality I delements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Added ccid validity check before PIN registration
Changed excessive idling default/max values Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes Avl records from memory Faster GPS FIX after leaving sleep mode 'o'doset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card		2017.07.24	Minimized power consumptions in sleep modes
Dual sim operator search functionality implementation FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'dodoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality 10 elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Towing Detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card	01.03.03.Rev00		SD runtime improvement
FW update improvement Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Unplug detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Changed excessive idling default/max values
Changed odometer value (m->km) SMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes Avl records from memory Faster GPS FIX after leaving sleep mode 'dodoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality I O elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Dual sim operator search functionality implementation
SIMS/GPRS getgps command improvement Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'dodoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement Unplug detection - now detects "plug" events too Data sending without microSD card			FW update improvement
Now there are 200 authorised sms numbers Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes Avl records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Towing Detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Changed odometer value (m->km)
Operator Black list implementation Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excessive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			SMS/GPRS getgps command improvement
Authorized GSM numbers list increased to 200 Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement Towing Detection improvement Unplug detection improvement Unplug detection improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Now there are 200 authorised sms numbers
Unplug feature improvement SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes AvI records from memory Faster GPS FIX after leaving sleep mode 'dodset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Operator Black list implementation
SMS command 'sdformat' – deletes all internal memory SMS command 'deleterecords' – deletes Avl records from memory Faster GPS FIX after leaving sleep mode 'odoset' SMS command fixed Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card		2017.07.10	Authorized GSM numbers list increased to 200
O1.00.32.Rev00 2017.07.10 2			Unplug feature improvement
01.00.32.Rev00 2017.07.10 20			SMS command 'sdformat' – deletes all internal memory
01.00.32.Rev00 2017.07.10 2017.07.10 Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card	01.00.32.Rev00		SMS command 'deleterecords' – deletes AvI records from memory
01.00.32.Rev00 2017.07.10 Excesive Idling functionality improvement DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Faster GPS FIX after leaving sleep mode
01.00.32.Rev00 2017.07.10 DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			'odoset' SMS command fixed
DOUT state is restored on startup Towing activation timeout max value increased Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Excesive Idling functionality improvement
Averaging now works in Deep Sleep mode too Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			DOUT state is restored on startup
Minor OBD improvements Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Towing activation timeout max value increased
Bluetooth pairing improvements FMB962/FMB964 hardware support added Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Averaging now works in Deep Sleep mode too
• FMB962/FMB964 hardware support added • Records sending when link is open fixed • Added 5 geozones functionality • IO elements ICCID and SD Status are added • Added Keyword functionality • Crash detection improvement, now it detects consecutive events • Towing Detection improvement • Unplug detection improvement • GPRS connection stability improvement • Improved Unplug detection – now detects "plug" events too • Data sending without microSD card			Minor OBD improvements
Records sending when link is open fixed Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Bluetooth pairing improvements
Added 5 geozones functionality IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detects "plug" events too Data sending without microSD card			FMB962/FMB964 hardware support added
O1.00.30.Rev05 2017.05.26 IO elements ICCID and SD Status are added Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Records sending when link is open fixed
Added Keyword functionality Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card	01.00.30.Rev05	2017.05.26	Added 5 geozones functionality
Crash detection improvement, now it detects consecutive events Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			IO elements ICCID and SD Status are added
Towing Detection improvement Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card			Added Keyword functionality
O1.00.30.Rev05 O1.00.Rev05			Crash detection improvement, now it detects consecutive events
 Unplug detection improvement GPRS connection stability improvement Improved Unplug detection – now detects "plug" events too Data sending without microSD card 			Towing Detection improvement
 Improved Unplug detection – now detects "plug" events too Data sending without microSD card 			Unplug detection improvement
Data sending without microSD card			GPRS connection stability improvement
			Improved Unplug detection – now detects "plug" events too
 getgps SMS commands format fixed 			Data sending without microSD card
1 5 5			getgps SMS commands format fixed

		Default configuration changed – allow sending in roaming and unknown modes
01.00.22.Rev.12	2017.04.13	Improved connection to GSM operators
01.00.22.Rev.11	2017.04.07	Improved LiPo battery charger state interpretation
	2017.03.28	Updated GPS firmware version
01.00.22.Rev.09		Hardware detection improvement
		Corrected "Green driving" values: "m/s²" conversion to "g"
		SIM PIN entering fixed.
		 SMS Reading improved. Don't go to DeepSleep if there are SMS to read in memory.
		GPS Fuel Counter fix.
01.00.22.Rev.06	2017.03.14	Jamming detection improvement.
		AutoGeofence functionality improvement.
		Entering to DeepSleep fixed
		IO elements "event only" parameter fix
		Improvement in connection to GSM operator
		Added SD card drive capacity parameter to Status window
		Added BeiDou satellite numbers
		Trip odometer I/O calculation improvement.
01.00.19.Rev.02	2017.01.18	OBD data, VIN, DTC error count reading, DTC PID's requests, DTC
		delete via Bluetooth
		Fixed GPS no fix lock-up
01.00.17.Rev.03	2017.01.06	Bluetooth Voice call added
01.00.15.Rev.00	2016.11.23	Accelerometer axis values XYZ as IO elements
		Configuration send/save over Bluetooth
		NTP+NITZ Time synchronization
		EcoDriving auto calibration
